DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 is vague and indefinite because there is insufficient antecedent basis for the limitation "the film coated on the layer A by the CVD or PECVD process".

Terminal Disclaimer

2. The terminal disclaimer filed on 11/3/2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 10/683,852 and 10/683,935 has been **NOT** been accepted.

The disclaimer fee in accordance with 37 CFR 1.20(d) has not been submitted.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1773

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-15 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over:

(a) claims 1-16 of copending Application No. 10/683,852 (US 2004/0086734);

(b) claims 1-17 of copending Application No. 10/683,935 (US 2004/0076818).

Although the conflicting claims are not identical, they are not patentably distinct from each other because the copending Applications claim films with the recited relationship between number of elevations and elevation height, layer composition, additives, barrier properties, and method of making.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to adjust the degree of orientation (claim 9) of the films claimed in copending Application '852 depending on the mechanical, barrier, and dimensional stability desired for specific applications.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
